## Power Derating Curve:

## Repetitive Pulse Information

(This information is for reference only and is not guaranteed performance.)

If repetitive pulses are applied to resistors, pulse wave form must be less than “Pulse Limiting Voltage”, “Pulse Limiting Current” or “Pulse Limiting Wattage” calculated by the formula below.

$$V_p = K\sqrt{P \times R \times T/t}$$

$$I_p = K\sqrt{P/R \times T/t}$$

$$P_p = K^2 \times P \times T/t$$

Where:  $V_p$ : Pulse limiting voltage (V)  
 $I_p$ : Pulse limiting current (A)  
 $P_p$ : Pulse limiting wattage (W)  
 $P$ : Power rating (W)  
 $R$ : Nominal resistance (ohm)  
 $T$ : Repetitive period (sec)  
 $t$ : Pulse duration (sec)  
 $K$ : Coefficient by resistors type (refer to below matrix)  
[ $V_r$ : Rated Voltage (V),  $I_r$ : Rated Current (A)]

Note 1: If  $T > 10 \rightarrow T = 10$  (sec),  $T/t > 1000 \rightarrow T/t = 1000$

Note 2: If  $T > 10$  and  $T/t > 1000$ , “Pulse Limiting power (Single pulse) is applied

Note 3: If  $V_p < V_r$  ( $I_p < I_r$  or  $P_p < P$ ),  $V_r$  ( $I_r$ ,  $P$ ) is  $V_p$  ( $I_p$ ,  $P_p$ )

Note 4: Pulse limiting voltage (current, wattage) is applied at less than rated ambient temperature. If ambient temperature is more than the rated temperature (70°C), please decrease power rating according to “Power Derating Curve”

Note 5: Please assure sufficient margin for use period and conditions for “Pulse Limiting Voltage”

Note 6: If the pulse waveform is not square wave, please judge after transform the waveform into square wave according to the “Waveform Transformation to Square Wave”.

RMCF Coefficient (K) Matrix

Ohmic Value	K
$R < 10\Omega$	0.50
$10\Omega \leq R < 100\Omega$	0.45
$100\Omega \leq R < 1K\Omega$	0.35
$1K\Omega \leq R < 10K\Omega$	0.25
$10K\Omega \leq R$	0.20

## Waveform Transformation to Square Wave

1. Discharge curve wave with time constant " $t$ " → Square wave

2. Damping oscillation wave with time constant of envelope " $t$ " → Square wave

3. Half-wave rectification wave → Square wave

4. Triangular wave → Square wave

5. Special wave → Square wave

The thermal resistance of the RMCP will be similar to the RMCF. For example, the RMCF2512 and the RMCP2512 will have similar surface temperatures at 1W; the RMCP is designed to withstand higher temperatures associated with high power levels.

## Part Marking Instructions

### E96 and E24 Values for 0805-2512 (1% tolerances)

The nominal resistance is marked on the surface of the overcoating with the use of **four character markings**.

- Values  $< 100\Omega$  will use "R" as the decimal holder.

### E24 Values for 0805-2512 (5% tolerance, $\leq 0.91\Omega$ )

The nominal resistance is marked on the surface of the overcoating with the use of **four character markings**.

- Values  $\leq 0.91\Omega$  will use "R" as the decimal holder.

### E24 Values for 0805-2512 (5% tolerance, $\geq 1\Omega$ )

The nominal resistance is marked on the surface of the overcoating with the use of **three character markings**.

- Values between  $1\Omega$  and  $9.1\Omega$  will use "R" as the decimal holder.

### E24 Values for 0603

The nominal resistance is marked on the surface of the overcoating with the use of **three character markings**.

- Values between  $0.1\Omega$  and  $9.1\Omega$  will use "R" as the decimal holder.
- Values  $\geq 10\Omega$  will use no decimal holder.
- 5% tolerance is not underlined. 1% tolerance is underlined.

(Effective date for 1% underline marking is date codes on/or after April 1<sup>st</sup> 2025)

- Values that are both E24 and E96 follow E96 marking rules.

### E96 Values for 0603 size (1% tolerances)

A two character number is assigned to each standard R-Value (E96) as shown in the chart below. This is followed by one alpha character which is used as a multiplier. Each letter from "Y" - "F" represents a specific multiplier.

Alpha Character = Multiplier	
Y = 0.1	C = 1000
X = 1	D = 10000
A = 10	E = 100000
B = 100	F = 1000000

Chip Marking	Value
01B =	$10.0 \times 100 = 1 \text{ K}\Omega$
25C =	$17.8 \times 1000 = 17.8 \text{ K}\Omega$
93D =	$90.9 \times 10000 = 909 \text{ K}\Omega$

## RoHS Compliance

Stackpole Electronics has joined the worldwide effort to reduce the amount of lead in electronic components and to meet the various regulatory requirements now prevalent, such as the European Union's directive regarding "Restrictions on Hazardous Substances" (RoHS 3). As part of this ongoing program, we periodically update this document with the status regarding the availability of our compliant components. All our standard part numbers are compliant to EU Directive 2011/65/EU of the European Parliament as amended by Directive (EU) 2015/863/EU as regards the list of restricted substances.

## "Conflict Metals" Commitment

We at Stackpole Electronics, Inc. are joined with our industry in opposing the use of metals mined in the "conflict region" of the eastern Democratic Republic of the Congo (DRC) in our products. Recognizing that the supply chain for metals used in the electronics industry is very complex, we work closely with our own suppliers to verify to the extent possible that the materials and products we supply do not contain metals sourced from this conflict region. As such, we are in compliance with the requirements of Dodd-Frank Act regarding Conflict Minerals.

## Compliance to "REACH"

We certify that all passive components supplied by Stackpole Electronics, Inc. are SVHC (Substances of Very High Concern) free and compliant with the requirements of EU Directive 1907/2006/EC, "The Registration, Evaluation, Authorization and Restriction of Chemicals", otherwise referred to as REACH. Contact us for complete list of REACH Substance Candidate List.

## Environmental Policy

It is the policy of Stackpole Electronics, Inc. (SEI) to protect the environment in all localities in which we operate. We continually strive to improve our effect on the environment. We observe all applicable laws and regulations regarding the protection of our environment and all requests related to the environment to which we have agreed. We are committed to the prevention of all forms of pollution.
